" Let's share
what nature
inspires "

Editorial

"We are a French family business with a passion for producing and marketing quality natural ingredients for professionals. That's why we attach great importance to controlling every stage of the production chain, from the cultivation of perfume plants to the delivery of our products.

We are proud to be able to rely on traced supply chains that respect both man and nature. Based in the Drôme region, we are one of the world's leading producers of essential oils, hydrolats and aromatic specialties, with solid experience in organic farming.

We offer personalized support for every project, and are committed to supporting sustainable development. At Elixens, we are determined to share with you our passion for natural ingredients inspired by nature."

Synthesis - Camphor powder

Use: cosmetics.

INCI name: *Camphor* / **Geographical origin:** Chine

Synthesis - Menthol

Use: food and cosmetics.

INCI name: *Menthol* / **Geographical origin:** India

Our partnership with Parfums Provence Ventoux

A cooperative of producers since 1989

Created in 1989, the Société Coopérative Agricole Parfums Provence Ventoux groups together **167 growers cultivating 3900 hectares of land spread over 5 départements**: Gard, Drôme, Ardèche, Vaucluse, Alpes de Haute-Provence.

It assembles, controls and markets their production of conventional and organic essential oils, **mainly Lavandin, Lavender** and Clary Sage. The Cooperative has always been rooted in the Plateau de Sault and Mont Ventoux regions. **It carries a history, a memory of know-how, a cultural and economic heritage.** Over the years, the Cooperative has built up relationships of trust with its customers, and thanks to this new partnership with Elixens, it aims to develop its presence in France and abroad, in line with its values.

A partnership for people and the environment

The partnership between PPV and Elixens France aims to supply high-quality conventional lavender and lavandin at competitive prices.

This partnership will also enable the cooperative's producers **to develop virtuous agro-ecological practices**, while enhancing the value of the Provencal territories and the men and women who work on almost 4000 ha. Last but not least, this partnership will foster the emergence of new commercial relationships between, on the one hand, **users who are sensitive to product quality and wish to enter into sustainable and innovative sourcing partnerships, and, on the other hand, producers looking for balanced, long-term relationships.**
