what nature
inspires »

Editorial

« We are a French family business passionate about producing and marketing quality natural ingredients for professionals. This is why we attach great importance to the control of each step of the production chain, from the cultivation of perfume plants to the delivery of our products.

We are proud to rely on channels traced in the respect of man and nature. Based in the Drôme, we are one of the main producers of essential oils, hydrolats and aromatic specialties, with a solid experience in organic farming.

We offer personalized support for each project and are committed to supporting sustainable development. At Elixens, we are determined to share with you our passion for natural ingredients inspired by nature." »

Certifications

The ELIXENS Group has always been committed to a real practice of respect for the environment, throughout the production chain, the safety of the consumer and its employees as well as the valorisation of natural products.

In the Drôme region (in the heart of France), our raw material suppliers are farmers of the SICA Bioplantes cooperative, the leading producer of organic aromatic and medicinal plants in France. No fertilizers, weed-killers or chemical pesticides are used on these crops. The soil is nourished by a compost made of the distillery's straws. All the productions of the SICA Bioplantes are certified ECOCERT and BIOPARTENAIRE.

ELIXENS France, member of the BIOPARTENAIRE association, is committed to a fair trade approach controlled by ECOCERT Environnement and by the association according to the FIABLE standard (certified organic, fair trade and equitable) for its offer of essential oils, hydrolats, floral waters and herbal specialties from its partnership with SICA Bioplantes.

We have also obtained the ECOCERT certification for our organic aromatic compositions. We commit ourselves to respect the European (EC regulation 834/2007) and French rules concerning the organic production mode. We are also involved since 2019 in the certification process of **Authentic Provence**. We had the pleasure to obtain in 2022, the **PLATINUM medal awarded by the organization ECOVADIS**, rewarding our ethical and CSR approach.

Food safety and the harmlessness of products are also particularly important issues. In this increasingly demanding environment, we are pleased to announce that our production site in Eurre (Drôme) has obtained **ISO 22000** certification. This certification is an additional argument attesting to the control of our processes, allowing you to be comforted in your control of food risks.

DEFINITIONS

• **Organic Agriculture certification:** Products from Organic Agriculture and certified by CERTIPAQ BIO.

• **COSMOS STANDARD certification:** COSMOS follows the principles of the Ecocert standard:

- 1) Promote the use of ingredients from organic farming.
- 2) To use production and transformation processes that respect the environment and human health.
- 3) To integrate and develop the concept of "green chemistry".

• **BIOPARTENAIRE:** product resulting from an equitable step labeled Biopartenaire controlled according to the reference frame FIABLE.

• **AUTHENTIC PROVENCE:** a label that promotes the know-how, innovations and heritage of Provence. The raw materials are certified " Authentic Provence " according to the " AP " Charter available on the website : cosmetiques.authenticprovence.com.

• **NMPA:** a logo attesting that the INCI is "Ok chine", i.e. that it is listed IECIC and that a registration has been made on the NMPA platform.

The list proposed by Elixens is currently in constant evolution.

*Our organic
essential oils*

Bergamot furocoumarin free

Fresh note with a regenerating function*

Use: cosmetics, perfumery and aromatherapy.

INCI name: *Citrus Aurantium Bergamia fruit oil* / **Geographical origin:** Italy

Use: cosmetics and aromatherapy.

INCI name: *Spiraea ulmaria* extract, *helianthus annuus* seed oil / **Geographical origin:** France

Our organic and fair trade sector

Dauphiné-Provence sector

A fair and sustainable partnership with organic farmers

This exclusive partnership offers you a vast aromatic palette in the respect of the nature and the men. We offer you products whose **traceability is guaranteed from the plant** and the possibility to anticipate **your needs according to the harvests**. We offer essential oils, hydrolats/floral waters and dry plants from this sector.

In a few numbers

- **Nearly 30 years of organic experience** for our producers' cooperative and more than 20 years of organic experience for Elixens.
- **More than 10 years** of fair trade labeling.
- **More than 50 farmers** in Dauphiné-Provence.
- **More than 36 species on over 400 hectares** of organically grown plants.

The SICA Bio-Plantes

Elixens is involved in a **sustainable and exclusive** way with about fifty farmers in Dauphiné-Provence through a **farmers' cooperative, the SICA Bio-Plantes**.

More than 36 species of perfume, aromatic and medicinal plants are **grown entirely in organic agriculture**. To obtain a **high quality of plants**, the local organic farmers use elaborate but **natural technicals**. Their knowledge of the vegetative cycles and the relationships between plant species ensures the respect of the biodiversity, the quality of the water, the soil and the landscapes of the region.

Certified and labelled products

Our products from SICA Bioplantes are **labelled Biopartenaire®** since 2009, a requiring label that combines fair trade and organic agriculture.
